The world's third largest nation is not on any map.

There are 1,3 billion persons with disabilities worldwide.

CBM has been in Italy for 25 years
and around the world for more than a century.

Disability worldwide briefly

1,3 billion

People with disabilities worldwide

16%

of the global population, meaning 1 in every 6 people

Source: WHO 2022

142 million

People with disabilities living in situations of extreme poverty

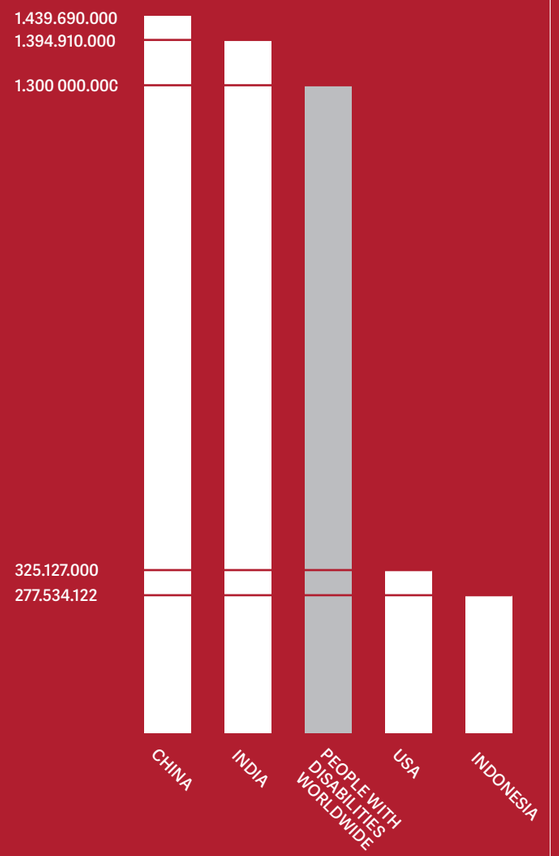

Source: WHO 2022

~ 80%

of people with disabilities live in low- and middle-income countries

Fonte: OMS 2022

If all people with disabilities lived in the same country, it would be the third largest country in the world by population, after India and China.

1. About us

CBM Italia is an international organization committed to health, education, employment, and the rights of persons with disabilities where the need is greatest, both globally and in Italy.

Founded in Milan in 2001, CBM Italia was officially recognized as a Non-Governmental Organization (NGO) by the Italian Ministry of Foreign Affairs and International Cooperation in 2009.
In 2023, following its registration in the National Register of the Third Sector (RUNTS), CBM Italia acquired the legal status of a Third Sector Entity (ETS).
In 2024, it became a Foundation.

CBM Italia is part of CBM International (Christian Blind Mission), an international organization that has been active since 1908 across Africa, Asia, and Latin America, working to improve the quality of life of persons with disabilities.

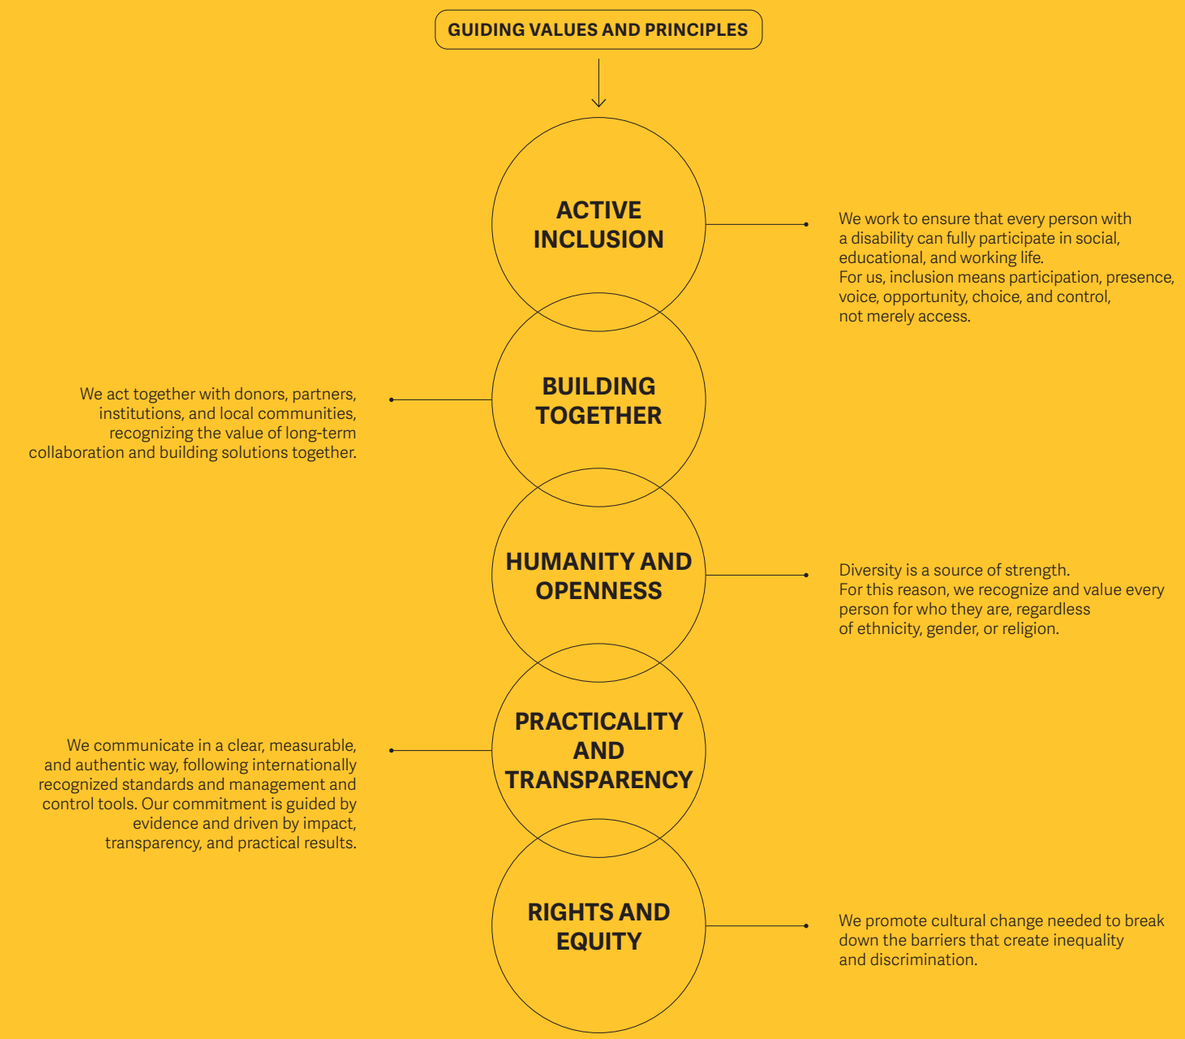

Vision

We believe in a world where persons with disabilities can live free from barriers and discrimination.

Mission

We work to promote education, employment, health and the rights of persons with disabilities, wherever the need is greatest, in Italy.

2. How and where we work

CBM Italia adopts a **human rights-based approach** in all its interventions, guided by the principles of the **United Nations Convention on the Rights of Persons with Disabilities (CRPD)**, both internationally and in Italy.

Through an inclusive and participatory approach, CBM works not only to provide practical support to those in need, but also to make communities and environments more accessible and inclusive, contributing to sustainable and systemic change.

CBM's operational model is based on implementing activities through **local partners**, including local stakeholders and institutions, government authorities, civil society actors, and organizations of persons with disabilities, all of whom play a key role in facilitating and promoting local development. Working in this way means fostering and strengthening partnerships that recognize and leverage existing human, material, and technical resources and expertise within the intervention contexts.

IN PARTNER COUNTRIES

This approach is reflected in CBM's structure in partner countries, which relies on Country Offices that form part of the CBM International network and are managed entirely by local staff. At the same time, the **technical advisory teams for each sector of intervention (initiatives)** provide technical support to ensure high-quality programs and identify and disseminate good practices and lessons learned.

The strategic areas of intervention on which CBM Italia focuses its activities in partner countries are: Inclusive Health, **Inclusive Community-Based Development, and Inclusive Humanitarian Action**.

IN ITALY AND IN EUROPE

This same commitment guides CBM Italia's work at both national and European level, where forms of discrimination persist that, although different from those found in developing countries, continue to hinder inclusion, access to rights, and equal opportunities for persons with disabilities.

In these contexts, CBM Italia works to promote the rights of persons with disabilities and foster a culture of inclusion that recognizes them as active agents of change, free from discrimination and able to enjoy the same opportunities as everyone else.recognizes. This commitment is put into practice through:

- **inclusive education**, through projects that promote the participation of all students, with and without disabilities, in the education system and help strengthen the capacity of educational communities to be inclusive;
- **the promotion of participation and independent living**, through initiatives that support persons with disabilities in playing an active role in all areas of society and in exercising autonomy;
- **training for practitioners and professionals**, aimed at integrating the disability perspective into all programs and initiatives, in accordance with the principle of disability *mainstreaming*.

Areas of Intervention in Partner Countries

Inclusive Health

We ensure access to high-quality health services, with a particular focus on persons with disabilities. Through projects and multi-stakeholder partnerships, we work to remove barriers to **healthcare, rehabilitation, and healthcare information** and to promote **inclusive health services and systems.**

Community-Based Inclusive Development

We promote the inclusion of persons with disabilities through **educational initiatives, skills development, and income-generating activities**.
We support children and adults with disabilities and their families, promoting their active **participation** and full empowerment within their communities.

Inclusive Humanitarian Action

We strengthen **prevention, preparedness, and crisis response systems** so that humanitarian aid and services are accessible to persons with disabilities, and no one is left behind.

Areas of Intervention in Italy and Europe

Inclusive Education

We promote the participation of all students, with and without disabilities, in the **school system through projects** that facilitate learning and contribute to creating learning environments that are inclusive for all students.

Participation and Independent Living

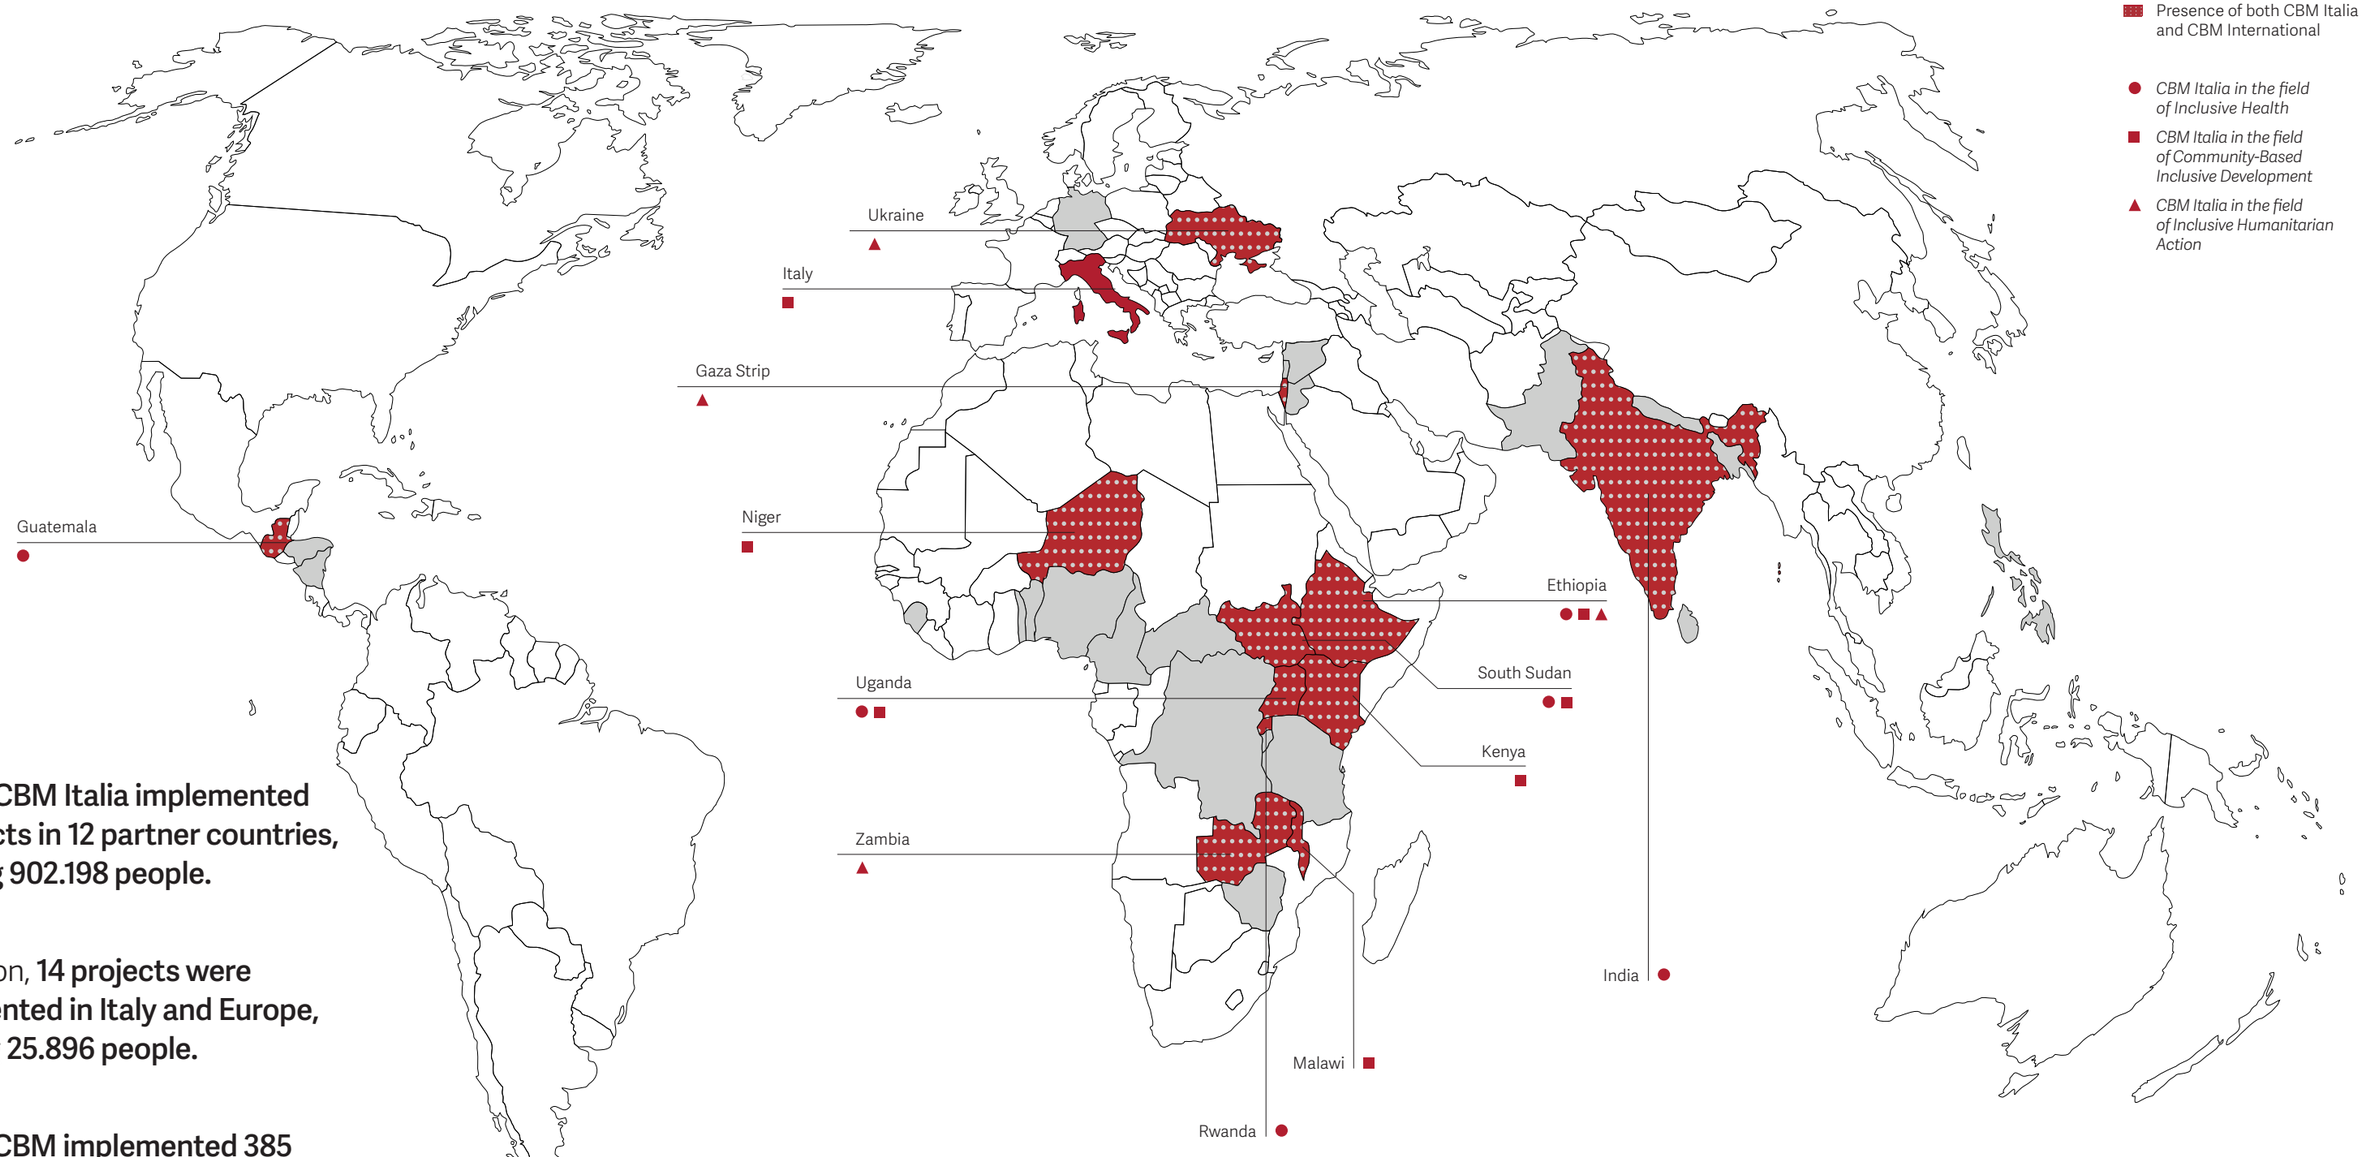

We support initiatives that promote the **autonomy of persons with disabilities**, enabling full participation in all aspects of life and decision-making processes

Training and Awareness Raising

We train professionals so that disability is included in programs and interventions. We also work with communities to promote **rights** and inclusion for all.

3. Key results and flagship projects

In 2025, **CBM Italia implemented 41 projects in 12 partner countries, reaching 902.198 people.**

In addition, **14 projects were implemented in Italy and Europe,** reaching **25.896 people.**

Overall, **CBM implemented 385 projects across 35 countries,** reaching **10.383.451 people.**

IN PARTNER COUNTRIES

In 2025, CBM Italia consolidated its international presence by implementing **41 projects in 12 countries** (Ethiopia, Kenya, Malawi, Niger, South Sudan, Rwanda, Uganda, Zambia, Guatemala, India, Gaza and Ukraine), expanding its work into new contexts affected by humanitarian crises.

The project portfolio shows a clear concentration in Africa, where CBM Italia has an established presence and well-developed partnerships. Ethiopia remains the organization's main country of intervention, with cross-cutting activities spanning its key areas of work.

The country's central role reflects not only CBM Italia's long-standing presence, but also its strategic importance for Italian development cooperation: Ethiopia is also a key partner under the Mattei Plan for Africa. Within this framework, CBM Italia operates in a context characterized by strong institutional relations and growing attention to inclusive and sustainable development models. Alongside **Ethiopia, Uganda and South Sudan** are also key countries of operation, where the organizationo has built a strong position over the years, including in fragile and highly complex settings. CBM Italia also maintains a significant presence in **Kenya, Malawi, Niger, Rwanda, Guatemala and India**, drawing on specializedexpertise while retaining the flexibility needed to respond effectively to local needs.

Activities focus on **inclusive health, Community-Based Inclusive Development (CBID) and humanitarian action**, with particular attention to the inclusion of persons with disabilities.

In 2026, in line with its strategy of growth and geographical diversification, CBM Italia further expanded its geographical reach by launching newly funded projects in **Mozambique, Lebanon and Tanzania**. It also began exploring and developing opportunities in additional priority countries for future interventions.

INCLUSIVE HEALTH

Promoting accessible and inclusive healthcare systems is one of CBM Italia's key areas of work. Its programs focus on **eye health**, the prevention and treatment of **Neglected Tropical Diseases (NTDs), hearing health** and the **rehabilitation of physical disabilities**, through services that are integrated into national healthcare systems and delivered in close collaboration with governments, healthcare facilities and local partners.

The organization helps to reduce avoidable blindness and visual impairment by improving access to healthcare services, even in the most remote and marginalized areas, where people with disabilities face greater barriers to accessing care. At the same time, it invests in the continuing professional development of ophthalmologists, nurses, optometrists and healthcare workers, strengthening local expertise and promoting person-centered care. For example, between 2022 and 2025, the **"The Bright Sight"** project, implemented in South Sudan with the support of AICS, trained 300 professionals and reached over 90,000 patients through prevention, eye care and healthcare inclusion initiatives.

Inclusive health also encompasses interventions for the treatment, rehabilitation and support of people with physical disabilities, where innovation is a central element of CBM Italia's approach.

In 2025, the project to **3D-print customized orthopedic aids** – previously developed at the CORSU hospital in Uganda – was extended to **Kenya**, with the aim of making innovative and sustainable assistive technologies more accessible.

288.359
People reached through inclusive eye health interventions

30.044
Eye surgeries performed, including:

- **7.099** cataract surgeries

- **11.438** Eyeglasses and vision aids distributed

- **2.430** Medical staff and technicians trained

In 2025, two major programs funded by Italian Cooperation were launched. **RISE – Strengthening Inclusion and Sustainability in Employment**, in Ethiopia, supports technical and vocational training and employment opportunities for **951 young people with and without disabilities**, strengthening the connection between vocational training institutions and the private sector. In **Uganda**, the **Eco-Food** project promotes sustainable and inclusive agricultural value chains, strengthening food security and economic opportunities for more than **6,000 people.**

Interventions also continued in **Niger,** including the project **Women and People with Disabilities in Action for an Eco-Sustainable Agropastoral System**. The project aims to strengthen food and nutrition security among communities in the Zinder region by promoting access to food and safe drinking water, as well as resilient agri-food production systems, with the support of the Italian Cooperation.

COMMUNITY-BASED INCLUSIVE DEVELOPMENT

Alongside healthcare interventions, CBM Italia promotes **Community-Based Inclusive Development (CBID)**, fostering the full participation of people with disabilities in the social and economic life of their communities.

The programs include inclusive education, vocational training, employment opportunities, entrepreneurship development and food security initiatives.

11.067
People reached through Community-Based Inclusive Development initiatives

1.698
People engaged in employment activities

INCLUSIVE HUMANITARIAN ACTION

CBM responds to both protracted crises and sudden emergencies, where a rapid response must go hand in hand with inclusion. The approach adopted involves the active participation of people with disabilities and other vulnerable groups right from the preparedness stages, continuing through the immediate response and reconstruction phases, ensuring that no one is left behind.

In 2025, the organization strengthened its presence in contexts characterized by conflict, climate crises and forced displacement, expanding its operations in **Gaza** and **Ukraine**.

In the Gaza Strip, through the ***Inclusive Community Kitchen*** project, carried out in partnership with **the *Atfaluna Society for Deaf Children***, CBM Italia provided an integrated emergency response, creating employment opportunities for deaf people within a community kitchen and distributing hot meals to **250 displaced families**. The project also ensured the distribution of essential aids, helping to restore independence and access to services for many people with disabilities affected by the conflict.

In **Zambia**, a new initiative has been launched to mitigate the effects of climate change, improving access to safe water, sanitation and hygiene practices, as well as strengthening the protection and inclusion of women, children and people with disabilities in the areas most affected by drought.

In **Ethiopia's Tigray** region, CBM Italia continues to support communities affected by the conflict through humanitarian aid and the strengthening of essential services. The **SAFE Tigray** project has provided financial assistance to **1.745 households**, while supporting the resumption of agricultural activities through the distribution of drought-resistant seeds, irrigation equipment and technical training. At the same time, the **SHIRE** project continues to strengthen the regional healthcare system, improving rehabilitation and inclusion services for people with disabilities, while support for the **St. Louise** Eye Clinic in Mekelle continues to ensure the continuity of ophthalmological care in a context where access to healthcare services is precarious.

Overall, in 2025, **inclusive humanitarian** interventions reached **11.326 people**, over **60 percent of whom were women**, confirming CBM Italia's commitment to ensuring a humanitarian response that prioritizes the rights, dignity and inclusion of people with disabilities.

INCLUSIVE HUMANITARIAN RESPONSE IN UKRAINE

In the context of the crisis in Ukraine, people with disabilities, estimated at over 6 million, with a sharp increase compared to the 2.7 million before the conflict, are among the most vulnerable groups. They face barriers to accessing information, essential services, and humanitarian aid, further exacerbated by mobility challenges, social isolation, and insecurity.

In this scenario, characterized by high and complex needs, CBM is implementing inclusive humanitarian programs focused on rehabilitation, healthcare, and awareness-raising, with the aim of ensuring that persons with disabilities are not excluded from the emergency response.

Among the areas most affected is the oblast of Chernihiv, in the north of the country, directly impacted by the early stages of the conflict, where over 150,000 people have been displaced and approximately 9,200 civilian buildings damaged or destroyed. In this context, at the end of 2025, CBM Italia launched an emergency intervention, implemented from 2026 in collaboration with the local partner **League of the Strong (LoS)**, targeting in particular veterans of war and persons with disabilities.

The project aims to improve living conditions and access to social protection services for persons with disabilities affected by the conflict, while strengthening the resilience of the most vulnerable communities through targeted and inclusive interventions.

GRAZIELLA'S STORY

«Today, I am the only pediatric ophthalmic anesthesiologist in South Sudan. I am someone who can help.»

Graziella: a specialty that saves children's lives.

South Sudan
– The Bright Sight

«The opportunity to specialize in pediatric ophthalmic anesthesia has transformed my professional life and enabled me to acquire skills that did not previously exist in our country. In South Sudan, there are still very few anesthesiologists, and I was the only one to undertake this specialist training.

Today I work at the Buluk Eye Center, where I treat dozens of children every day. Seeing the impact these services have on their lives and those of their families confirms to me just how important it is to continue investing in the training of healthcare staff.

Many parts of the country still lack access to specialist professionals. That is why I believe it is essential to offer other young people the chance to study and gain qualifications. Today, I am someone who can help; tomorrow, I hope there will be many others who can do the same, because these skills save children's sight and, often, their lives too».

Dr Graziella Thomas Along,
pediatric ophthalmic anesthesiologist at the Buluk Eye Center in Juba, South Sudan.

OLIVE'S STORY

A Life dedicated to the rights of persons with albinism.

Olive Namutebi, founder of Albinism Umbrella

Uganda
– Albinism Umbrella

«When I was at school, other children did not want to sit next to me. As a result, I often ended up in the back row, where I could not clearly see what the teacher was writing on the board. I felt frustrated and was frequently bullied by my classmates.

Despite these challenges, I continued my studies, graduated, and built a career in the banking sector. At one point, I realised just how exceptional my journey had been and felt a strong responsibility to give something back to my community. That is why I decided to dedicate my life to defending the rights of persons with albinism.»

In 2015, Olive founded **Albinism Umbrella**, a non-profit organisation dedicated to protecting the rights and promoting the inclusion of persons with albinism, and one of CBM's partner organisations.

«Today, the greatest challenge remains stigma. Many of the barriers we face in accessing education, healthcare and other opportunities in life stem from discrimination and a lack of awareness.» of discrimination and a lack of awareness».

Through her work, Olive highlights not only the barriers that persons with albinism face in accessing education and healthcare, but also the discrimination that continues to affect them, particularly women and girls. In a society that remains deeply patriarchal, many women with albinism experience **multiple forms of discrimination** linked both to their condition and to gender stereotypes, with significant consequences for their family, social and personal lives.

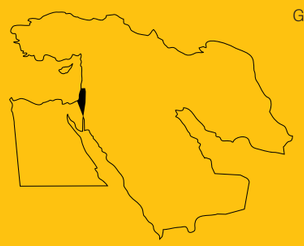

Olive Namutebi, *Founder and Executive Director of Albinism Umbrella, a CBM partner in Uganda*

ZAHDI'S STORY

«If there's bombing, I don't know where to go; I need someone to guide me, to stay with me and look after me.»

Zahdi, aged 21, a young person with a disability. No one should be left behind

For people with disabilities living in the Gaza Strip, the humanitarian crisis exacerbates their challenges and vulnerabilities. In a context marked by bombings, forced displacement and shortages of essential goods, access to information, aid and basic services can become even more difficult.

In 2025, CBM, together with its local partner Atfaluna Society for Deaf Children, supported a **community kitchen** that provided regular meals to the most vulnerable families and those displaced by the conflict. The project also distributed assistive devices for people with disabilities and directly involved twenty young people with hearing impairments in meal preparation and distribution activities, promoting their active participation in community life.

Zahdi, aged 21, *a young person with a hearing impairment involved in the activities of the community kitchen supported by CBM in the Gaza Strip.*

IN ITALY AND EUROPE

INCLUSIVE EDUCATION

CBM Italia strengthens inclusive education systems, in line with Article 24 of **the UN Convention on the Rights of Persons with Disabilities**, by engaging schools, educational services and learning communities.

Through **"Changing Perspectives: saying, doing, talking about disability**", CBM has put the UN Convention into practice via a free training program for schools and non-school organizations. The third edition in 2025 involved over 480 organizations, 17,000 children and young people aged 3 to 18, and 2,000 adults, including teachers, educators and school staff.

""**Inclusive Generation: Participation, Guidance and Autonomy** is implemented in three upper secondary schools in the Italian regions Puglia, Calabria and Sardinia, involving students aged 15 to 18 and the entire school community. The project combines training for school staff on disability and inclusion, dedicated guidance pathways for students with disabilities and their families, and innovative educational activities such as the game **"Beyond! Seeing and Overcoming Barriers."**

In 2025, Erasmus+ project **Just Two Steps: Schools of Inclusion and Participation** came to an end. The project was aimed at primary and lower secondary schools in Italy and Hungary and involved 43 classes, nearly 900 students and 50 teachers across Milan, Turin and Budapest in the co-design of solutions for school accessibility.

The project produced an educational toolkit and a recommendations document and was recognized as a good practice by Indire (the Erasmus+ Agency for Italy in the fields of school education, higher education and adult education) on the Erasmus+ Project Results platform.

In the Milan area, the **Zero Dropout – Integrated Projects to Combat School Dropout** project continues, addressing school dropout among **11–16-year-old girls and boys** experiencing vulnerable circumstances. Through the project, educators and teachers have been trained on school and social inclusion. Young people and families have taken part in our workshops on barriers, accessibility, inclusion and diversity.

PARTICIPATION AND INDEPENDENT LIVING

CBM Italia has expanded its commitment to national and European projects aimed at promoting the autonomy, well-being and social relationships of persons with disabilities, consolidating a model based on full and meaningful participation in all areas of life, without discrimination.

Through Erasmus+ project **KEEP Driven: Knowledge, Empowerment and Participation of Young People with Disabilities**, we worked with Italian, French, Latvian and other European partners to promote the civic and democratic participation of young persons with disabilities aged 18–30.

Through training, exchange, empowerment, research and advocacy activities, we supported young citizens with disabilities in co-creating a European campaign aimed at bringing their concerns and demands to the attention of institutions and society, and at promoting concrete conditions that enable them to influence decisions affecting their lives and communities.

Among the project's main achievements was the development of a **position paper, drafted by young people** as part of the advocacy campaign and presented to the European Commission, bringing their concerns and proposals into the institutional dialogue and strengthening their ability to influence decision-making processes that affect them.

In 2026, our CERV Citizens project **WyDE.EU – Empowerment of Young Women with Disabilities in Europe** was launched, in collaboration with Organizations of Persons with Disabilities and youth organizations from several European countries. The project promotes the empowerment of young women with disabilities and expands opportunities for their voices to be heard, recognized and included in democratic life and in shaping the future of the European Union.

CBM Italia is a partner in the Erasmus+ project ***RAIN – Raising Awareness against Natural Disasters and Improving the Network of Volunteers in Local Publics***, aimed at raising awareness of natural disaster risks and strengthening the participation of volunteers, particularly young people, through regional and transnational cooperation. CBM Italia has strengthened inclusive models for persons with disabilities and people in vulnerable situations in emergency and disaster management, including through an international conference held at the Università Cattolica del Sacro Cuore in Milan to promote a more informed, inclusive and responsive culture of emergency management that addresses the needs of the most vulnerable people.

In 2026, the project **YOUFORIA**, funded under the Erasmus+ European Youth Together program, will be launched. Coordinated by CBM Italia in collaboration with the European Network on Independent Living and Organizations of Persons with Disabilities in Italy, the Netherlands and Serbia, the project gives young people with disabilities the opportunity to participate in urban regeneration initiatives, making a concrete contribution to the development and strengthening of youth policies in their cities.

In Italy, CBM took part in **No One Left Behind**, a project promoted by the Dicastery for Communication of the Holy See to improve communication accessibility for people with hearing and visual disabilities. Through A Garden on the Move, implemented with Fondazione SON and the Municipality of Milan – Municipality 2, we transformed a green space into an accessible garden and community vegetable garden, open to the public and featuring elements related to the rights set out in the UN Convention.

As part of the Municipality of Milan's **100 ideas – If it Doesn't Exits, We'll Make it Happen** project, CBM Italia acted as a mentor organization, supporting young persons with disabilities in organizing a trip to Disneyland Paris and in a campaign to raise awareness about removing physical, cultural and social barriers to ensure full participation in leisure activities.

PROMOTING RIGHTS AND COMBATING DISCRIMINATION

Through the consolidation of local, national and European partnerships, CBM reinforces its commitment to combating discrimination against persons with disabilities, promoting and protecting the rights of those experiencing socio-economic disadvantage and by the intersection of gender, age and migration background.

Through Erasmus+ project **CARE-INT – Combating Intersectional Discrimination and Violence against Women with Disabilities**, we promote the rights of women with disabilities in Italy and the Netherlands. Through our research activities and the development of a new training

module for future care professionals, we strengthen the sector's capacity to recognize, prevent and address violence and discrimination in care settings. In this process, the training manual is a key tool for translating knowledge, methodologies and experience into practical skills, helping future professionals strengthen their ability to identify, prevent and combat violence against women with disabilities.

In Piedmont, through **Deaf Migrants, Foreigners Twice Over**, promoted by the Fondazione Istituto dei Sordi di Torino and supported by Fondazione Time2, CBM Italia has fostered the inclusion of asylum seekers with sensory disabilities. In 2025, we delivered online workshops for professionals, developed a collection of good practices and inclusive strategies, and created a glossary on migration and disability.

Through the **PRIDE – Intersectional Protection and Referral against Violence for People with Disabilities for a More Equal Society** project, we are strengthening the accessibility of anti-violence services in the Italian regions Piedmont, Lombardy and Valle d'Aosta, reducing communication, cultural and physical barriers. The project, promoted by Fondazione Istituto dei Sordi di Torino, CBM Italia and LEDHA, with the support of the Intesa Sanpaolo Charity Fund, enabled us to train professionals from anti-violence centers, social workers and psychologists on accessible communication and reception and protection tools.

In 2026, **On Everyone's Side – National Network for Accessible Support and Protection for All Women with Disabilities Experiencing Violence**, promoted by Fondazione Istituto dei Sordi di Torino, will be launched. The project focuses on ensuring accessible, specialized and continuous services for women with disabilities who are victims of violence. In particular, the project includes the establishment of a national helpline and a physical and virtual support center.

Furthermore, in 2026, CBM Italia conducted a national study on disability and employment with Fondazione E. Zancan, as part of the research program launched in 2023 with the study *"Disability and Poverty in Italian Families."* Through direct consultations with around 500 persons with disabilities, the study explored barriers and opportunities in accessing employment and their impact on quality of life.

GAMES FOR INCLUSION

During 2025, CBM Italia strengthened its commitment to educational initiatives carried out in partnership with schools, through staff training, technical supervision and the adaptation of project activities to ensure accessibility.

This commitment took concrete form, in particular, with **the development of innovative educational tools** designed to promote a culture of inclusion in schools: two games that have been well received by teachers and students. **BEYOND! Seeing and Overcoming Barriers**, developed as part of the **Inclusive Generation** project, promoted by CBM Italia with the support of Fondazione CDP, a non-profit organization of the Cassa Depositi e Prestiti Group, and in collaboration with ANFFAS (National Association of Families and People with Intellectual Disabilities and Neurodevelopmental Disorders).

Created in partnership with the Hackability association, the game uses participatory activities and dynamics to encourage students to engage with the physical, cultural and social barriers that persons with disabilities face in everyday life, fostering dialogue, reflection and the overcoming of stereotypes and prejudices.

BUILDING A TRULY INCLUSIVE SCHOOL

Italy – Inclusive Generation

«School is the most important thing for a child or young person, for true inclusion.»

For Aloisio, the parent of a young person with a disability, inclusion is a challenge that involves not only schools but society as a whole. "Here, "disability" is still an insult," he says, highlighting how prejudice and cultural barriers continue to shape the upbringing of many young people.

His experience highlights the difficulties that can still arise in the school environment today, particularly during adolescence, when the risk of exclusion and isolation becomes more apparent. This is why he believes it is essential to invest in schools as places of participation, relationships and growth for all students.

Aloisio's testimony forms part of the **Inclusive Generation** initiative, a project promoted by CBM Italia to encourage the full participation of students with disabilities through awareness-raising, training and guidance activities aimed at young people, families and school communities.

EUROPE – KEEP DRIVEN

The voice of young Europeans with disabilities

«For the first time, I was the author of a political message, not its recipient.»

Thanks to the Erasmus+ KEEP Driven project, young persons with disabilities from Italy, France and Latvia took part in a training and advocacy program on the themes of human rights and independent living.

Through meetings, study visits and international workshops, the participants helped to develop an **advocacy campaign** aimed at European institutions.

«The experience led to the drafting of a position paper, a manifesto and a communication campaign co-created by the young people involved, with the aim of promoting greater participation by persons with disabilities in the decision-making processes that affect them».

Gloria, an Italian participant in the Erasmus+ KEEP Driven project coordinated by CBM Italia.
